EUGENE, ORE. -- The latest editions of two leading reference guides serving the North American softwood forest products industry are now available. The 2012 Big Book is the largest and most widely recognized directory of the North American softwood industry. The 2011 Yearbook is the industry's most comprehensive source of historical market information. Random Lengths publishes both reference guides annually, although the Big Book was last updated in 2010.

The 2012 Big Book's 880 pages contain 4,454 listings of U.S., Canadian, and offshore softwood companies and 17,186 personnel. The convenient guide shows addresses, phone and fax numbers, e-mail addresses and Web sites, company profiles, and other key information. More than 85% of the listings from the 2010 Big Book have changed.

The 2011 Yearbook features more than 300 pages of data and provides price histories for the past 11 years for more than 290 key lumber and panel items. Easy-to-read graphs

INFORMATION SERVICES FOR THE FOREST PRODUCTS INDUSTRY

track monthly price averages for the past five years. The Yearbook lists economic data such as housing starts and home mortgage rates from 2008-2011. Also included are a nine-year market chronology and an international section that offers price histories, trade-weighted dollar information, and export volumes by species and destination from 2006-2011.

The Big Book is available for \$239.95. The Yearbook is available for \$46.95. Random Lengths offers discounts for multiple-copy purchases.

Random Lengths Publications Inc. is an Oregon-based publisher of newsletters, market analyses, price histories, and reference books for the forest products industry. Its weekly newsletter, Random Lengths, tracks current prices and market trends for North American lumber and panel markets.
